EXPERIENCE

CBIT, Hyderabad — Web Developer

OCT 2023 - DEC 2023

Successfully led the completion of a crucial phase in the "AI Enabled Student Mentoring System" project under the guidance of Asst. Professor Gangadhara Rao Kommu. [\(certificate\)](#)

Key Achievements:

- Implemented robust Student and Mentor Login and Registration functionalities.
- Streamlined the process of students submitting undertaking forms, ensuring seamless data collection.
- Developed a comprehensive system for mentors to efficiently handle and review various forms submitted by students.
- Implemented a feature allowing mentors to track and monitor individual student progress.
- Facilitated effective communication by enabling mentors to provide valuable feedback and guidance to students, fostering a supportive learning environment.

Farmers Connect

JAN 2024 – PRESENT

web application solution that empowers farmers by providing a seamless interface for seeking advice from agricultural experts, sharing information with middlemen, and accessing valuable resources such as weather forecasts and market insights. This platform aims to bridge the gap between expertise and on-field implementation, foster knowledge exchange,and enhance agricultural productivity for farmers.
